

Sharing SwiftUI state with @ObservedObject - iExpense SwiftUI Tutorial 2/11

```
8
9 import SwiftUI
10
11 class User: ObservableObject {
12     @Published var firstName = "Bilbo"
13     @Published var lastName = "Baggins"
14 }
15
16 struct ContentView: View {
17     @ObservedObject private var user = User()
18
19     var body: some View {
20         VStack {
21             Text("Your name is \(user.firstName) \(user.lastName).")
22             TextField("First name", text: $user.firstName)
23             TextField("Last name", text: $user.lastName)
24         }
25     }
26 }
27
28 struct ContentView_Previews: PreviewProvider {
```
